

Multi-factor Authentication (MFA): Forgot Device

If you set up MFA but don't have your device, you can get a one-time passcode via email to sign in and access your EP products. Once you have your device, you can go back to accessing your passcode as usual.

Forgot Device - How to Get a One-Time Passcode via Email

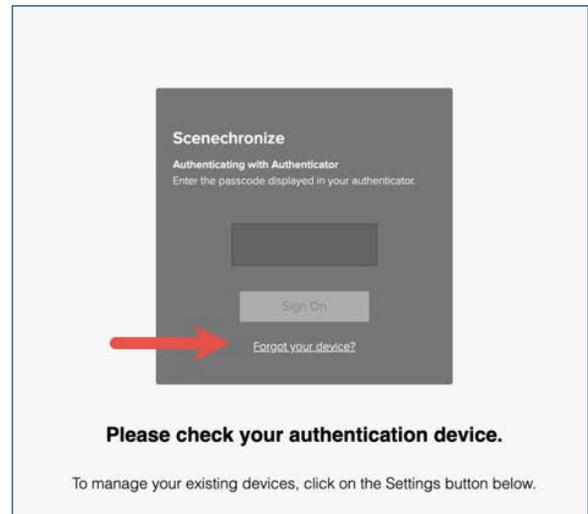

After you sign in to your EP product with your EP Account username (email address) follow the steps below to get your one-time passcode.

If you no longer have access to your device (got a new phone, etc.) or deleted or updated your authentication app, [click here](#) for directions on how to permanently reset your MFA.

STEP 1

If you don't have access to the device where you usually get your passcode:

1. Click the "Forgot your device?" link.

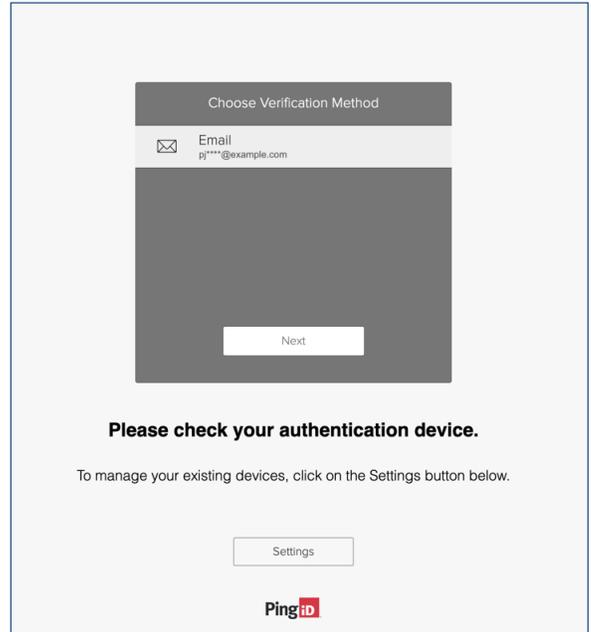

Sample screen only. Your screen may vary.

Multi-factor Authentication (MFA): Forgot Device

STEP 2

2. The system confirms your email address. Click **Next**.

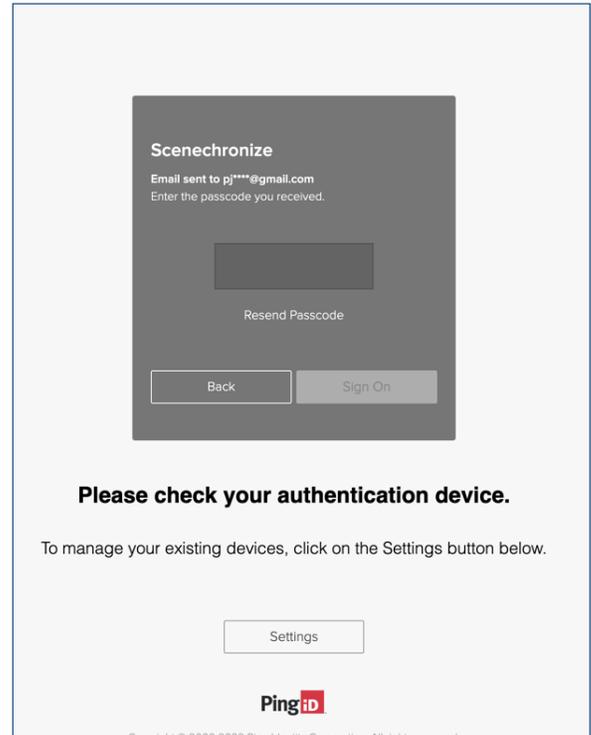

Sample screen only. Your screen may vary.

STEP 3

3. A confirmation message displays letting you know you were sent an email. This email contains your passcode.

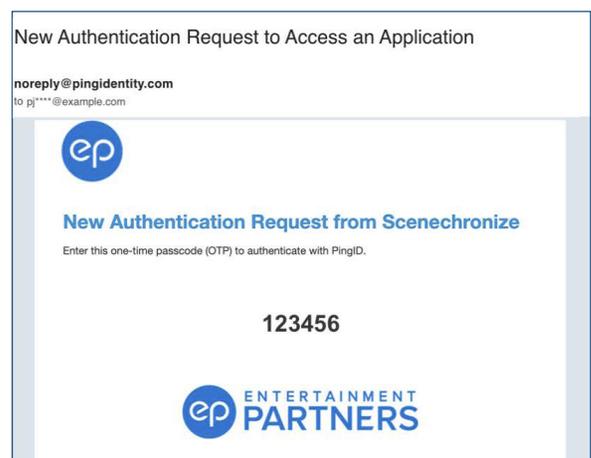

Sample screen only. Your screen may vary.

STEP 4

4. Look for the email with your passcode in your inbox.

Note: Don't see the email with your passcode? Check your spam or other folders. After a few minutes, click **Resend Passcode**.

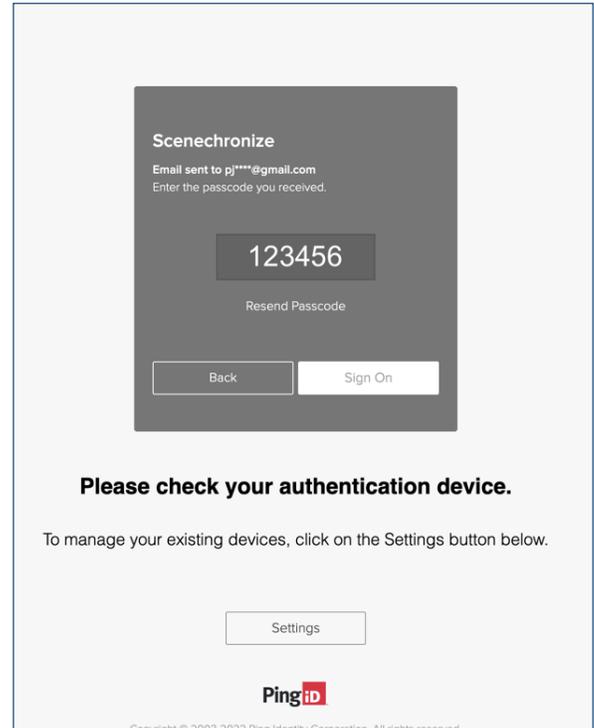

Sample screen only. Your screen may vary.
